

AARON RAMOS

Research Assistant

Aaron Ramos is a 29-year old civil engineer from Nicaragua who has dedicated his career to infrastructure development. He earned his degree in Civil Engineering from Universidad Centroamericana (UCA) in 2019 and later specialized in road geotechnics with a postgraduate degree from Universidad Americana (UAM) in 2022.

Aaron has served as both a resident engineer and project supervisor on major bridge and highway construction projects. He is currently a technical research assistant in the Structures and Materials Laboratory at the University of Miami.

Driven by a desire to broaden his expertise, Aaron aims to pursue a master's degree in Construction Project Management.

Fun Fact: Aaron enjoys staying active and fit—and he has a particular love for trying different kinds of hot wings.
