# DE DIEGO CASTRO

## Research Associate

Ms. De Diego has over 20 years of practical and professional experience in civil engineering, having graduated at the Polytechnic University of Madrid (Spain) with a Bachelor's Degree in Civil Engineering. Her professional career has many facets, starting in the private consulting sector being deployed to conduct structural assessment of existing structures in the field, structural surveying, as well as structural and environmental monitoring. She has an extensive technical expertise and knowhow in the application of non-destructive techniques and load testing methods, which have been applied to understand and evaluate the different structural and material pathologies. Since 2017 she works in the University of Miami as a Research Associate in the Structures and Materials Laboratory focusing on the knowledge of composite materials used for internal and external reinforcement and supporting the UM-SML operations, testing and preparation of test reports. She is an active member of ASTM and ACI.
