

CARLOS ALFONSO PEREZ BORJAS

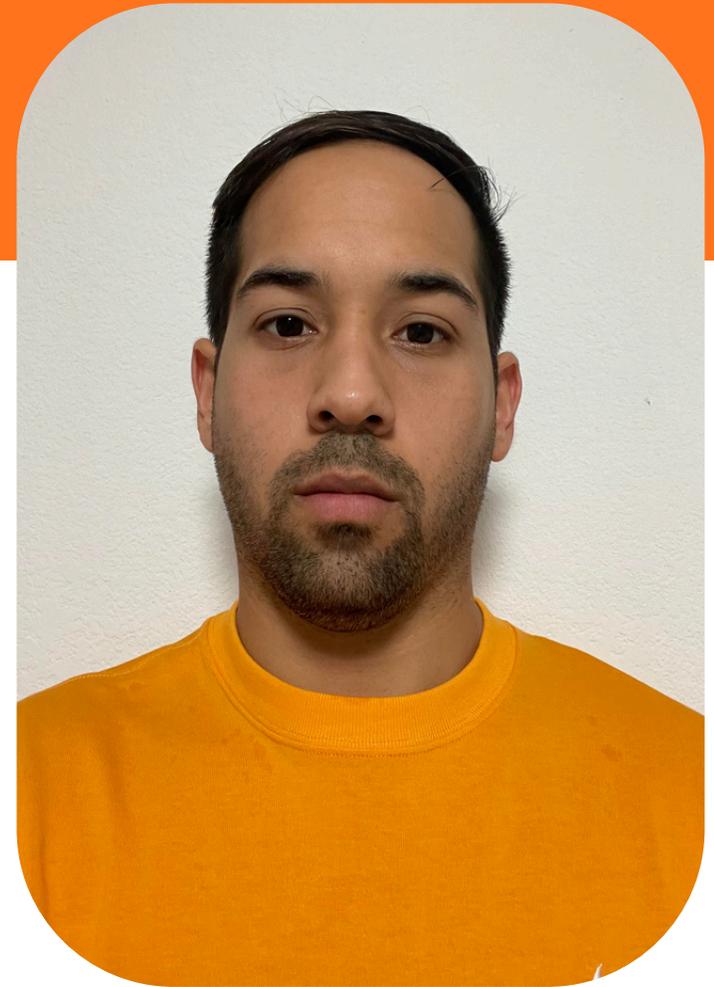

Research Assistant

Carlos A. Perez holds a Bachelor's degree in Civil Engineering from the University of Zulia, along with studies in Architecture and specializations AutoCAD, Budget Studies, and Construction Inspection. These qualifications have allowed him to excel across various areas on civil engineering, including material analysis and project development.

Since 2024, Carlos has been part of the team at the Structures and Materials Laboratory, where he serves as a research assistant involved in a range of material testing and research projects. His work focuses on continuous improvement and the optimization of construction practices through applied and fundamental research on innovative materials—from concrete to advanced composites. He is passionate about contributing to sustainable and forward-thinking solutions within the construction industry.

Fun Fact: Carlos enjoys researching innovative engineering topics in his spare time and is a passionate sports enthusiast—especially when it comes to baseball.
