

ROGER SOLIS

Research Associate

Roger Solis was born in Nicaragua and is currently pursuing a Bachelor's degree in Marine Affairs with a minor in Civil Engineering at the University of Miami, after earning an Associate's degree in Civil Engineering. Since joining the College of Engineering in 2016, Roger has gained extensive experience working in the ISO 17025-accredited Structures & Materials Laboratory (SML).

He is passionate about integrating engineering principles with marine conservation efforts to create sustainable solutions for coastal communities.

Roger serves as a liaison between the SML and Environmental Health and Safety. He holds multiple certifications, including ISO 17025, ASTM, ACI, SIKA, Laboratory Safety, and Hazardous Waste Management. He also conducts a wide range of ASTM and internal lab method tests, utilizing several universal test frames located in the SML laboratory.
